

## ACCELERATED CYBER & INFORMATION SECURITY TECHNOLOGY

Join the fight against cyber-crimes with a program designed for those who already hold a bachelor's degree but are looking to advance or switch their career. No matter your background at work or in school, anyone with an existing bachelor degree could benefit from this program.

With ECPI University's Accelerated Cyber & Information Security Technology program, you could earn an additional bachelor's degree in as little as 12 months.

This program is focused on the necessary skills, knowledge, and certifications needed to stand out in the competitive cybersecurity job market.

### Outcomes

Students enrolled in the B.S. Cyber & Information Security Technology Degree Program have the opportunity to plan, design, implement, and support skills in operating systems, networking, software programs, and security. As a career-focused university, our experienced instructors are also familiar with the principles of customer service when assisting clients with technical support issues.

#### Graduates of this program are expected to:

- ▶ Analyze and solve complex computing problems.
- ▶ Design, implement, and evaluate computing-based solutions and meet requirements.
- ▶ Communicate effectively and professionally.
- ▶ Make informed judgements based on ethics, laws, regulatory requirements, and professional standards.
- ▶ Function as a team member or leader.
- ▶ Apply security principles and practices to the environment, hardware, software, and human aspects of a system.
- ▶ Analyze and evaluate systems to maintain operations in the presence of risks or threats.

### Possible Career Track

Earning your degree in cyber & information security technology could qualify you for work in the technology and computer science industries, particularly if you have a background in software and computer systems or are knowledgeable about cyber and mobile networks.

#### Graduates of this program may be qualified to work as:

- ▶ Cybersecurity Operations & Maintenance Specialist
- ▶ Network & Data Center Administrator
- ▶ Virtual Server Administrator
- ▶ Storage Technology Manager
- ▶ Systems Analyst
- ▶ Systems Administrator

\*As a condition of employment in any security position, a prospective employee may be required to pass a full back ground investigation for the purpose of obtaining a security clearance.
